| 13 | Which VAP (Value Added Products) can India export?  | Canned Tuna, Canned Sardine, AFD Shrimps, Breaded and battered shrimp and fish, fish fingers, Surimi Analogue products, Fish / Shrimp Pickle  |
| 14 | Can you provide ready-to-eat products with cheese/salad/pickle like low carb products?                                  | Yes   |
| 15 | Which Indian cuisine seafood products do you have?  | Fish / shrimp curry, fish/shrimp Biryani, fish/shrimp Pulaou, Fish Kappa Curry, fish/shrimp Samosa, fish/shrimp cutlet  |
| 16 | What is the end use of the product "fish oil in capsule"?   | They fight inflammation and may help prevent heart disease and a decline in brain function. Because fish oil contains a lot of omega-3s   |
| 17 | Which are the potential users of the product?   | E.g. Athletes, Physical and mental Fitness savvy people   |
| 18 | Can you provide products with ingredients like No-Gluten, No-MSG, or Halal product,                                     | Yes   |

|    |  |   |
|----|--|---|
|    | Kosher product, MSC certified, ASC certified?  |   |
| 19 | What is the availability and rates of Black Tiger along with areas of production?            | The export unit value varies from market to market and size between 8 to 14 US\$ per KG. The production area of BT is 66,209Ha.   |
| 20 | How to obtain cephalopods with consistent quality from India?                                | Most of Indian exporters, especially from the west coast, should be able to provide cephalopods consistently mainly during Mid June to December. The prior PO with the exporter shall help as well. |
| 21 | Can you provide information about the supply chain and traceability of the seafood products? | Yes   |
| 22 | What sustainability measures are in place for the products?                                  | Around 38% of seafood is based on cultured items. Fishers are using appropriate nets for fishing.   |
| 23 | Are the products sourced from well-managed fisheries or sustainable aquaculture practices?   | Yes   |
| 24 | Are there any environmental certifications or eco-labels associated with the products?       | Yes   |
| 25 | What certifications do Indian products have?   | e.g. BAP, MSC, ASC  |
| 26 | What are the quality control measures in   | Proper handling of the harvested material, regular check-up of labor force, testing in NABL accredited labs, PET, etc.  |

|    |   |   |
|----|---|---|
|    | place during harvesting, processing, and transportation ?                       |   |
| 27 | What are the storage and handling conditions recommended for the products?      | On par with quality standards, all the frozen products stored in -20°C to -22°C throughout the supply chain                                     |
| 28 | Are the products tested for contaminants such as mercury, PCBs, or antibiotics? | Yes, from authentic labs  |
| 29 | Do you have any third-party certifications related to food safety?              | Yes   |
| 30 | How is the lab infrastructure in various parts of the country?                  | In India, at various locations, there exist NABL accredited labs. Various government agencies like MPEDA, EIA, etc., also provide lab services. |
| 31 | What is the pricing structure for different seafood products?                   | E.g. for Fr. Shrimp depending upon the market and size, it may vary between US\$ 5 to US\$ 14 per kg  |
| 32 | Are there any bulk purchase discounts or special offers available?              | It is possible depending upon the contract  |
| 33 | Can you provide customized packaging options to meet specific requirements?     | Yes   |
| 34 | What is the shelf life of the products and                                      | Around 18 months  |

|    |  |  |
|----|--|--|
|    | the recommended storage conditions?  |  |
| 35 | Does your packaging provide a recipe for ready-to-cook products?             | It could be provided as per the requirement  |
| 36 | What is the current availability/stock of the seafood products?              | Various as per the company   |
| 37 | What is the projected volume for the next 3 years?                           | Various as per the company   |
| 38 | What is the lead time for delivery or shipment?                              | Depends upon the country and product   |
| 39 | Are there any minimum order quantities or restrictions?                      | It is preferred to have around 25MT. Varies as per the company   |
| 40 | Can you accommodate special requests or provide customized product sourcing? | Yes  |
| 41 | Is there a possibility of e-commerce delivery?                               | Not sure   |
| 42 | Which brands are popular in our country's top retail stores/HoReCa?          | Various as per the company. For example, Forestar has their products in Japan's top retail chain 7/11 with certain branding. |
| 43 | Is there any distribution channel in the country that                        | Various as per the company   |

|    |  |  |
|----|--|--|
|    | prefers products from your company?  |  |
| 44 | Are there any new or innovative seafood products in your portfolio?  | Yes, e.g., dried purified cottoni granulate (seaweed product)    |
| 45 | Can you provide information on the latest market trends and consumer preferences?                          | Various market-wise (e.g., USA preferring ready-to-eat products) |
| 46 | Do you offer any value-added products or services such as pre-portioned cuts or ready-to-cook options?     | Yes  |
| 47 | Are the seafood products compliant with local and international regulations?                               | Yes  |
| 48 | Can you provide documentation such as certificates of origin, health certificates, and catch certificates? | Yes, with the consent of the stakeholder                         |
| 49 | Are there any specific import requirements or restrictions for the products in different countries?        | Yes  |

|    |  |   |
|----|--|---|
| 50 | What is the source of your seafood products/raw material? Can you provide information about the fishing or aquaculture methods used? | Yes. Details depend upon the exporter.  |
| 51 | Japan - How is the airport availability from southern India for fresh caught Tuna in order to reach within 24 hours?                 | Thiruvananthapuram, Kochi, Chennai, Madurai, Bangalore  |
| 52 | What is the average vessel transit time from India?  | Depends upon country e.g. UK it is 4-6 weeks  |
| 53 | Which airlines are operating cargo flights for Live and chilled products from India?   | <b>For Live:</b> 1. Singapore - Singapore airlines, Air India 2. Taiwan - Thai airway, catheo Pacific 3. Dubai and Bahrain - Emirates 4. China - SF Airlines, Thai airways.<br><b>For Chilled:</b> 1. Dubai - Air India, Emirates 2. Kuwait - Air India, Srilankan airlines, Emirates. 3. Muscat - Oman Airways 4. Bahrain - Emirates 5. Shenzhen - Sf Airlines 6. Hongkong - Cathay Pacific cargo & Hkg Airlines 7. Taipei - Thai Airways & Cathay Pacific Airways |
| 54 | What is the export infrastructure available in India?  | India has wide infrastructure availability right from Farm to processing plant and supply chain and logistics required for the same overseas.   |
| 55 | Why should one buy products from India?  | Because India provides Safe, trusted, certified marine products.  |
| 56 | What is the source for contacts of exporters doing VAP   | <a href="https://e-mpeda.nic.in/registration/Rpt_Region_Wise_Exporters_new.aspx">It is available on https://e-mpeda.nic.in/registration/Rpt_Region_Wise_Exporters_new.aspx</a>  |
| 57 | What are the wild shrimps Species currently available in   | In Fish Grouper, Crocker, Tuna, Pomfret, King Fish, Ribbon fish, in Shrimps White prawn, Tiger Prawn, Flower shrimp, brown shrimp. Detail could be served on the basis of requirement.  |

|    |  |   |
|----|--|---|
|    | India and which are its seasons?   |   |
| 58 | What are the mechanisms to deal with misbranding and fraud?                          | To connect with government of India organizations like EoI, DGFT, EIA, MPEDA, DoC, DGTR.  |
| 59 | What is the volume of export by India in 2022-23?                                    | 1.7 million MT  |
| 60 | India has approximately how many active exporters                                    | Close to 1000   |
| 61 | Which product does India export more?  | Frozen shrimp   |
| 62 | Whether India exports Clam, mussel, bivalves?  | Yes   |
| 63 | Whether India can export seaweed?  | Yes   |
| 64 | Which variety of product can India export under Crab?                                | Live, ready to eat or ready to cook products like pasteurized Crab meat                   |
| 65 | How much is the value (Rupee) of Marine products exported from India during 2022-23? | Rs.63,969.14 Crore  |
| 66 | How much is the value (USD) of Marine products exported from India during 2022-23?   | 8094.31 USD Million   |
| 67 | What are the major MP items exported from India                                      | Frozen Shrimp, Fr. Fish, Fr. Cuttlefish, Fr. Squid, Dried, Live, Chilled items and Others |

|    |   |   |
|----|---|---|
|    | during 2022-23?   |   |
| 68 | What is the growth % of Marine products exported during 2022-23?          | 26.73% in Quantity, 11.08% in Rupee value and 4.31% in USD  |
| 69 | What is the Share % of Frozen Shrimp in total exports during 2022-23?     | 40.98% in Quantity, 67.43% in Rupee value and 67.72% in USD |
| 70 | What is the Share % of Frozen fish in total exports during 2022-23?       | 21.24% in Quantity, 8.60% in Rupee value and 8.49% in USD   |
| 71 | What is the Share % of Frozen Cuttlefish in total exports during 2022-23? | 3.16% in Quantity, 3.68% in Rupee value and 3.65% in USD    |
| 72 | What is the Share % of Frozen Squid in total exports during 2022-23?      | 4.83% in Quantity, 5.62% in Rupee value and 5.62% in USD    |
| 73 | What is the Share % of Dried items in total exports during 2022-23?       | 14.57% in Quantity, 4.82% in Rupee value and 4.74% in USD   |
| 74 | What is the Share % of Chilled items in total exports during 2022-23?     | 1.41% in Quantity, 0.96% in Rupee value and 0.95% in USD    |
| 75 | What is the Share % of Live items in total exports during 2022-23?        | 0.45% in Quantity, 0.69% in Rupee value and 0.69% in USD    |

|    |   |  |
|----|---|--|
| 76 | Which are the major markets of Marine product?                                    | USA, China, European Union, South East Asia, Japan Middle East are the major importers   |
| 77 | What is the largest seafood export destination from India and its Share %?        | USA to be the major importer of Indian seafood in Quantity & value for a share of 32.52% USD terms   |
| 78 | What is the second largest seafood export destination from India and its Share %? | China as the second largest seafood export destination from India in quantity and value accounting for 23.37% in quantity and 18.64% in dollar terms |
| 79 | What is the third largest seafood export destination from India and its Share %?  | European Union as the third largest seafood export destination from India value accounting for 15.61% in dollar terms                                |
| 80 | What is the fourth largest seafood export destination from India and its Share %? | South East Asia is the fourth largest seafood export destination from India value accounting for 14.72% in dollar terms                              |
| 81 | What is the fifth largest seafood export destination from India and its Share %?  | Japan with a Share of 5.99% in dollar terms  |
| 82 | Whether there is a chance to provide more processed Tuna products in the UK?      | Yes, most probably   |
| 83 | Whether there is a chance to provide Tilapia?                                     | Yes  |
| 84 | Whether there is a chance to provide Black Tiger?                                 | Yes  |
| 85 | Whether there is a chance to provide Tuna   | Yes  |

|    |  |                      |
|----|--|----------------------|
|    | and their products under chapter 03?   |                      |
| 86 | How much quantity of Tilapia was exported from India during 2022-23?                                 | 18.82 Metric Tons    |
| 87 | How much is the USD value of Surimi and Surimi Analogue products exported from India during 2022-23? | USD 324.24 Million   |
| 88 | How much is the Rs value of Fr. Octopus exported from India during 2022-23?                          | Rs. 725.71 Crore     |
| 89 | How much quantity of Canned products was exported from India during 2022-23?                         | 2,864 Metric Tons    |
| 90 | How much is the USD value of Frozen Lobster exported from India during 2022-23?                      | USD 27 Million       |
| 91 | How much quantity of Frozen Squid was exported from India during 2022-23?                            | 83,846 Metric Tons   |
| 92 | How much quantity of Dried Items was exported from India   | 2,52,918 Metric Tons |

|     |  |                    |

|     |  |   |
|-----|--|---|
| 109 | Indian Shrimp exporters especially for L.vannamei grades of 21-25 and 26?      | <a href="mailto:pub@mpeda.gov.in">Please send us an email to pub@mpeda.gov.in and we will get back to you with the details.</a>   |
| 110 | Which are the most important species for export-oriented aquaculture in India? | Export-oriented aquaculture in India mainly focuses on Shrimp. The India Shrimp farms produce the exotic shrimp, <i>Litopenaeus vannamei</i> and the indigenous shrimp, <i>Penaeus monodon</i> for the overseas market.                         |
| 111 | Who is the regulating body of coastal aquaculture in India?                    | The Coastal Aquaculture Authority regulates the aquaculture farms in the coastal areas and the maritime State Government farms regulate the farms beyond the coastal areas.   |
| 112 | Whether India produces adequate seeds for shrimp aquaculture operations?       | Yes, the requirements of the seed for the shrimp aquaculture operations are met indigenously, as the country has about 400 shrimp hatcheries producing the shrimp seeds.  |
| 113 | What is the status of the Indian Aquaculture Feed sector?                      | India has about 35 shrimp feed mills and can meet the shrimp feed requirements of the farming sector.   |
| 114 | What are the bio-security protocols followed by shrimp farms in India?         | The imported shrimp broodstock/seeds are quarantined at the Aquatic Quarantine Facility( AQF) set up in Chennai, and tested for all OIE-listed pathogens. The shrimp hatcheries follow the guidelines issued by CAA for seed production.        |
| 115 | Does India supply Natural or Organic shrimp?                                   | The traditional shrimp farms in India produce shrimps with the quality of wild or natural shrimps. Since these farms mainly depend on natural feed, their produce meets organic standards. Also, India produces certified organic Tiger Shrimp. |
| 116 | What is the status of Mollusc culture in India?                                | India has the potential for mollusc cultures such as Edible oysters, Mussels and Clams. At present, commercial farming is carried out only for Green Mussels in few areas.  |
| 117 | Does India produce shrimps from Farm clusters?                                 | Yes, the National Centre for Sustainable Aquaculture, a body under MPEDA has registered more than 800 aqua farm clusters for sector-wide management.  |

|     |  |   |
|-----|--|---|
| 118 | How do you ensure that the farmed shrimp is safe for consumption?  | The Laboratories established by the Marine Products Export Development Authority are involved in testing the culture shrimps for the presence of any prohibited pharmacologically active substances. The farms are enrolled by MPEDA for the traceability of the produce. Moreover, the MPEDA is implementing the National Residue Control Plan (NRCP) to test the seeds, farmed shrimp, shrimp feed etc as per the directives of the European Union. The Pre Harvest Test (PHT) conducted by MPEDA ELISA labs ensure that farmed shrimps tested before harvest is residue free for export to the EU Market by testing banned antibiotics such as residues of Chloramphenicol and Nitrofurantoin metabolites. Further, the State level Task Forces are also regularly monitoring the aquaculture units locally. |
| 119 | Are Indian aquaculture farms maintaining environmental sustenance?   | The Indian aquaculture farms are eco-friendly and conduct sustainable farming operations. The water management is mainly carried through closed reservoir systems, and the effluents are treated before discharge.  |
| 120 | Are there instructions or guidance documents for shrimp farmers on the use of veterinary medicinal products?                             | The Coastal Aquaculture Authority (CAA) regulates shrimp farms in the maritime States of India. The CAA had issued a Public Notice dated 14.10.2015 advising farmers and hatchery operators to use only registered inputs, which are free from antibiotics. Besides, The Marine Products Export Development Authority (MPEDA) while extending technical guidance on sustainable aquaculture to farmers conducts village-level campaigns against the use of prohibited antibiotics in aquaculture and distributes pamphlets against the abuse of antibiotics in aquaculture.   |
| 121 | Is there a list of substances/ materials whose placing on the market or use for animal nutritional purposes is restricted or prohibited? | Yes, a list of twenty antibiotics/ drugs are prohibited by the Coastal Aquaculture Authority  |
| 122 | Does certified farmed shrimps available for export in India?   | Many shrimp farms and exporters are certified under certification schemes like BAP, ASC etc. To encourage more aqua farms to adopt certification, a new scheme Shaphari Certification is launched by MPEDA, for Assistance towards Certification of Aquaculture Units.  |
| 123 | Please list and describe briefly the methods of preserving the quality of  | Chill killing is the normal practice adopted by farmers for killing shrimps immediately after harvest so as to ensure quality and freshness. Thereafter the harvested shrimps are preserved in ice.   |

|     |  |   |
|-----|--|---|
|     | farmed shrimp for export?  |   |
| 124 | Where can I find suppliers for cooked Vannamei shrimp?                         | <a href="https://e-mpeda.nic.in/registration/Rpt_Region_Wise_Exporters_new.aspx">MPEDA has the exporter's directory at the MPEDA website. Please click the link https://e-mpeda.nic.in/registration/Rpt_Region_Wise_Exporters_new.aspx to get the details.</a>  |

| 136 | Do you have chitin/chitosan ? Provide more information about your offerings?   | The main sources exploited are two marine crustaceans, shrimp and crabs. It is made by treating shrimp and other crustacean shells with the alkali sodium hydroxide. Chitosan has a number of commercial and possible biomedical uses. It can be used in agriculture as a seed treatment and biopesticide, helping plants to fight off fungal infections. In winemaking, it can be used as a fining agent, also helping to prevent spoilage. In medicine, it may be useful in bandages to reduce bleeding and as an antibacterial agent; it can also be used to help deliver drugs through the skin. Other uses of chitosan that have been researched include use as a soluble dietary fiber.      |

| 179 | I'm interested in Frozen Imitation Crab Meat Shredded. Could you please provide details about the packaging options?                       | <p>The packaging options for frozen imitation crab meat shredded can vary depending on the manufacturer and brand. The common packaging options are:</p> <ol style="list-style-type: none"> <li>1. Vacuum-sealed Bags: Frozen imitation crab meat shredded is often packaged in vacuum-sealed bags. This packaging method helps to maintain the quality and freshness of the product by removing air and minimizing freezer burn. The bags are typically made of food-grade plastic that is suitable for freezing.</li> <li>2. Plastic Tubs or Containers: Another packaging option is plastic tubs or containers. These containers are usually re-sealable, allowing you to use the desired amount of shredded crab meat and then reseal the package for future use. Plastic tubs provide convenience and protection against freezer burn.</li> <li>3. Pre-portioned Pouches: Some brands offer frozen imitation crab meat shredded in pre-portioned pouches. These pouches contain a specific amount of shredded crab meat, making it convenient for portion control or individual servings. The pouches are often labeled with the weight or serving size.</li> <li>4. Bulk Packaging: Frozen imitation crab meat shredded may also be available in larger bulk packaging options for commercial use in foodservice establishments or industrial kitchens. These bulk packages can vary in size and may be suitable for restaurants, catering services, or other businesses that require larger quantities.</li> </ol> |

| 182 | I'm interested in Imitation Crab Flakes. Could you please share information about the processing methods and packaging options? | <p>Surimi made from imitation crab flakes is a popular seafood substitute commonly found in various culinary applications.</p> <p>Processing Methods:</p> <ol style="list-style-type: none"> <li>1. Deboning and Filleting: The primary fish used for surimi production, such as Alaskan pollock, is deboned and filleted to obtain the white fish meat. This meat is low in fat, making it suitable for further processing.</li> <li>2. Washing and Grinding: The fish meat is thoroughly washed to remove any residual blood, oil, or unwanted impurities. After washing, the meat is ground into a fine paste to create a uniform texture.</li> <li>3. Filtration and Separation: The ground fish paste undergoes filtration processes to separate the insoluble components, such as bones and scales. This filtration helps refine the paste and improve its texture.</li> <li>4. Addition of Additives: To enhance the texture, binding properties, and flavor of the surimi, various additives may be incorporated. These can include starches, egg whites, salt, sugar, and flavorings to create the desired taste and mouthfeel.</li> <li>5. Forming and Shaping: The processed surimi paste is shaped and formed into thin layers or sheets, which are then cut into flakes resembling crab meat. This shaping process gives surimi its distinctive flaky texture.</li> </ol> <p>Packaging Options:</p> <ol style="list-style-type: none"> <li>1. Fresh: Imitation crab flakes can be packaged in a fresh form and is commonly found in the refrigerated section of supermarkets. It is typically packed in sealed containers or vacuum-sealed pouches to maintain freshness.</li> <li>2. Frozen: Surimi products, including imitation crab flakes, are often available in the frozen section of grocery stores. They are packaged in sealed bags or boxes to preserve their quality and extend their shelf life.</li> <li>3. Pre-packaged: Surimi flakes may also be available pre-packaged in individual portions or bulk packaging. These pre-packaged options are convenient for quick and easy use in various recipes.</li> <li>4. Bulk: Foodservice or industrial suppliers often offer surimi flakes in bulk packaging options. These larger quantities are suitable for commercial use in restaurants, cafeterias, or food manufacturing facilities.</li> </ol> |

|     |  |   |
|-----|--|---|
| 226 | Can you share information about the nutritional value and health benefits of Seaweed products? | <p>Nutritional Value: Seaweed is a rich source of various nutrients, including vitamins, minerals, and fiber. The exact nutritional composition may vary depending on the type of seaweed, but in general, seaweed is known to be:</p> <ol style="list-style-type: none"> <li>1. Low in calories: Seaweed is relatively low in calories, making it a great addition to a balanced diet.</li> <li>2. High in iodine: Iodine is an essential mineral that plays a crucial role in thyroid function and overall metabolism. Seaweed, particularly brown seaweed like kelp, is a significant source of iodine.</li> <li>3. Rich in minerals: Seaweed is abundant in minerals such as calcium, magnesium, potassium, iron, and zinc, which are important for various bodily functions.</li> <li>4. High in vitamins: Seaweed contains vitamins such as vitamin C, vitamin A, vitamin E, vitamin K, and several B vitamins, including folate.</li> <li>5. Good source of protein: Certain types of seaweed, such as Spirulina sp., are rich in protein and provide all the essential amino acids.</li> </ol> <p>Health Benefits:</p> <ol style="list-style-type: none"> <li>1. Rich in antioxidants: Seaweed is packed with antioxidants, including flavonoids, carotenoids, and phycocyanins. These compounds help protect cells from oxidative stress and may have anti-inflammatory properties.</li> <li>2. Supports thyroid function: Seaweed's high iodine content makes it beneficial for thyroid health. Iodine is necessary for the production of thyroid hormones, which regulate metabolism, growth, and development.</li> <li>3. May aid in weight management: Seaweed is low in calories, high in fiber, and rich in nutrients. Including seaweed in your diet can help you feel fuller for longer, potentially assisting in weight management.</li> <li>4. Improves gut health: The fiber present in seaweed can promote a healthy digestive system by supporting the growth of beneficial gut bacteria.</li> <li>5. Cardiovascular health: Some studies suggest that seaweed consumption may help lower blood pressure, reduce cholesterol levels, and improve overall cardiovascular health.</li> <li>6. Potential anti-cancer properties: Certain compounds found in seaweed, such as fucoxanthin and fucoidan, have shown promising anti-cancer properties in laboratory studies. However, further research is needed to determine their effectiveness in human subjects.</li> </ol> |
| 227 | What are the different sizes and packaging options available for canned seafood products?      | Canned seafood from India are – Tuna chunks in brine/oil, sardine in brine/oil , mackerel fillets in brine/oil, sardine in tomato sauce   |

| 228   | Can you provide details about your Surimi products, including the ingredients and processing methods used? | <p>India surimi products are made by procurement of the best quality fish, resulting in high quality frozen Surimi. The entire manufacturing process is a combination of professionalism and perfectionism. The fish for surimi comes from fishing done by small mechanized boats going for a short fishing trip. Fresh catch are preserved by icing. The fish that is brought to the factory is very fresh. The freshness of the fish gives the best quality Surimi.</p> <p>Itoyori surimi</p> <p>Scientific Name: Japanese Threadfin Bream, <i>Nemipterus japonicus</i></p> <table><tr><th>GRADE</th><th>GEL STRENGTH</th><th>COLOUR</th><th>MOISTURE</th></tr><tr><td>SSA</td><td>1000/UP</td><td>48/UP</td><td>75% +/-1</td></tr><tr><td>SA</td><td>800/1000</td><td>48/UP</td><td>75% +/-1</td></tr><tr><td>AA</td><td>600/800</td><td>48/UP</td><td>75% +/-1</td></tr><tr><td>A</td><td>400/600</td><td>48/UP</td><td>75% +/-1</td></tr><tr><td>KA</td><td>200/400</td><td>48/UP</td><td>75% +/-1</td></tr><tr><td>C</td><td>100/200</td><td>48/UP</td><td>75% +/-1</td></tr></table> <p>Mamakari</p> <p>Scientific Name: Lesser sardines , <i>Sardinella</i> SPP</p> <p>Season: September To May</p> <table><tr><th>GRADE</th><th>GEL STRENGTH</th><th>COLOUR</th><th>MOISTURE</th></tr><tr><td>SSA</td><td>1000/UP</td><td>32/UP</td><td>75% +/-1</td></tr><tr><td>SA</td><td>800/1000</td><td>32/UP</td><td>75% +/-1</td></tr><tr><td>AA</td><td>600/800</td><td>32/UP</td><td>75% +/-1</td></tr><tr><td>A</td><td>400/600</td><td>32/UP</td><td>75% +/-1</td></tr><tr><td>KA</td><td>200/400</td><td>32/UP</td><td>75% +/-1</td></tr><tr><td>C</td><td>100/200</td><td>32/UP</td><td>75% +/-1</td></tr></table> <p><b>Big eye (Kintokidai),</b> Scientific Name: <i>Priacanthus</i> SPP</p> <p>Season: September To May</p> <p>Grade : same as for Mamakari, color: 32/up, moisture : 75%</p> <p><b>Lizard (ESO),</b> Scientific Name: <i>Saurida</i> Tumbil</p> <p>Season: August To May, Grade : A, KA, C,</p> <p>Color : 40/up, Gel strength : 400/600, 200/400, 200/100,</p> <p><b>Ribbon Fish (Tachiyuo)</b></p> <p>Scientific Name: <i>Lepturacanthus</i> Savala</p> <p>Season: September To May</p> <p>Grade : A, KA, C,</p> <p>Color : 40/up, Gel strength : 400/600, 200/400, 200/100,</p> <p><b>Croaker (Shiroguchi)</b></p> <p>Scientific Name: <i>Johnius</i> SPP</p> <p>Season: September To April</p> <p>Grade : KA, C,</p> <p>Color : 40/up, Gel strength : 400/600, 200/400, 200/100,</p> <p><b>Croaker (Kiguchi)</b></p> <p>Scientific Name: <i>Johnius</i> SPP</p> <p>Season: September To February</p> <p><b>Reef cod (Hata)</b></p> <p>Scientific Name: <i>Epinephelus</i> dicanthus</p> <p>Season: September To December</p> <p><b>Goat Fish (Himeji)</b></p> <p>Scientific Name: <i>Parupeneus</i> indicus</p> | GRADE    | GEL STRENGTH | COLOUR | MOISTURE | SSA | 1000/UP | 48/UP | 75% +/-1 | SA | 800/1000 | 48/UP | 75% +/-1 | AA | 600/800 | 48/UP | 75% +/-1 | A | 400/600 | 48/UP | 75% +/-1 | KA | 200/400 | 48/UP | 75% +/-1 | C | 100/200 | 48/UP | 75% +/-1 | GRADE | GEL STRENGTH | COLOUR | MOISTURE | SSA | 1000/UP | 32/UP | 75% +/-1 | SA | 800/1000 | 32/UP | 75% +/-1 | AA | 600/800 | 32/UP | 75% +/-1 | A | 400/600 | 32/UP | 75% +/-1 | KA | 200/400 | 32/UP | 75% +/-1 | C | 100/200 | 32/UP | 75% +/-1 |
